

## Maintenance Technician

Metko is Hiring!

We are looking for individuals who can work in a dynamic team environment. All positions are eligible for career advancement. Take a look at the details of this position and if it sounds like something you are interested in we encourage you to apply!

### Core Responsibilities

The position is responsible for performing diversified duties to install, troubleshoot, repair and maintain CNC manufacturing machines in a production setting as well as all facility equipment according to safety standards. In addition, this individual will be performing maintenance on the actual facility on an as-needed basis. The focus of this position requires the individual to perform (but not be limited to) the following:

Perform regular preventive maintenance on manufacturing machines, equipment and plant facilities.

Perform highly diversified duties to install and maintain production machines and the plant facility's equipment.

Provide emergency/unscheduled repairs of production equipment during production and performs scheduled maintenance repairs of production equipment during machine service.

Perform simple machinist duties and responsibilities.

Perform mechanic skills including, but not limited to - mechanical, electrical, pneumatic, and hydraulic troubleshooting and repair of production machines.

Read and interpret equipment manuals and work orders to perform required maintenance and service.

Diagnose problems, replace or repair parts, test and make adjustments.

Perform a variety of facilities maintenance functions including, but not limited to – basic plumbing, electrical, HVAC, carpentry, and/or handyman functions.

Use a variety of hand and power tools, electric meters and material handling equipment in performing duties.

Detect faulty operations, defective material and report those and any unusual situations to proper supervision.

Comply with safety rules and regulations (such as lockout/tagout) and maintain clean and orderly work areas.

## **Operating Environment**

This position reports directly to the Maintenance Manager. This position requires a strong interface with a number of departments - mainly with the production teams on machine and building issues and having dialogue with production focusing on preventative measures. This may involve educating operators.

## **Position Requirements**

Previous industrial maintenance experience is required.

Previous facilities maintenance experience is also highly desired.

Strong technical capacity (with an aptitude for computers since most machines are computer numeric controlled (CNC)).

Strong mechanical, electrical, pneumatic and hydraulic knowledge through on-the-job experience and/or formal education.

Strong ethical conduct.

Proficient communication skills are required to interface with company personnel and occasionally equipment manufacturers or suppliers.

Solid accuracy, consistency and attention to detail.

Must have initiative and be results-driven.
